ANNOUNCEMENT

To Our Patrons, Greeting:—

For thirty years the Humboldt Nursery Co. has been doing, not the largest, but a most satisfactory Nursery Business.

While we have gradually extended our business during that time we have constantly supplied a certain scope of country with Nursery Stock which is sufficient guarantee that our stock is good and our business methods fair.

We thank you for your past patronage and shall try to merit a continuance of the same.

We can furnish plans at reasonable prices, will supply stock and supervise planting if desired. Write us if interested, please.

Very truly yours,

Humboldt Nursery.

Always a pleasure to show stock—Sundays excepted.

APPLES.

SHADE TREES

size	each	doz.	100
5-7 ft.	.35	3.50	25.00

Soft Maple—One of the most widely distributed of our native forest trees, stands transplanting well, succeeds in nearly every locality and in a variety of soils, a very rapid grower.

Box Elder—A very rapid grower, light green foliage, spreading head, hardy and easily transplanted.

White Ash—A very fine tree for streets, parks or lawns, upright in growth forming a well rounded head, foliage dark glossy green, stands transplanting well but does not do well in shaded situations.

Green Ash—Very similar to the white ash in habit of growth and requirements.

American White Elm—A very large, spreading, native forest tree, good almost everywhere, unsurpassed for streets and parks, vigorous, healthy, rapid grower.

Carolina Poplar—One of the most rapid growing trees succeeds everywhere, unexcelled for quick growth and early effect.

American White Birch—An elegant native tree, very graceful with silvery white bark, very desirable for lawns.

European White Birch—Remarkable for its elegance, very graceful with white bark and slender branches, hardy, easily transplanted.

SPECIAL SHADE TREES

	Each	Doz.	100
5-7 ft.	.50	5.00	40.00

Black Walnut—A native species of large size and majestic form, valuable for nuts.

Linden or Basswood—One of our most beautiful rapid growing native forest trees, forms a round top, easily transplanted and succeeds well almost everywhere, a very desirable tree.

Hardy Catalpa (Speciosa)—An upright tree, has proven its hardiness in Iowa. When planted in groves it makes straight symmetrical trees suitable for posts or railroad ties, requires a good soil, a very useful tree.

Hard Maple—One of the handsomest of all native trees, a slow grower but vigorous and hardy forming a pyramidal compact head, foliage gorgeously colored after first fall frosts, very beautiful for streets, parks, or lawns.

Norway Maple—A native of Europe moderately slow in growth, the handsomest of all the maples, very spreading, round head,

stout, hardy, vigorous, one of the most desirable of shade trees, resembles the hard maple, foliage very beautiful.

Hackberry—A very fine, large native tree, spreading, vigorous, healthy, easily transplanted, succeeds in nearly every locality, a very desirable street tree.

Sycamore—A wide spreading, symmetrical tree, very handsome, a rapid grower, hardy, a good all-purpose shade tree.

ORNAMENTAL TREES.

	Each	Doz
5-7 ft.	.50	5.00

European Mountain Ash—A very beautiful tree of medium size with an erect stem, smooth bark and round head, covered in fall with bright scarlet berries.

Oak-Leaved Mountain Ash—A hardy tree of fine habit, medium size, a very fine lawn tree, foliage simple and deeply lobed, scarlet berries in fall.

Wier's Cut-Leaved Silver Maple—A remarkable and beautiful tree with finely cut foliage, a rapid grower, shoots slender and drooping.

Russian Olive—A small tree with silvery green foliage, flowers yellow and fragrant. Commonly known as Rose of Dandrun.

WEEPING TREES

Size	Each	Doz.
5-7	1.50	12.00

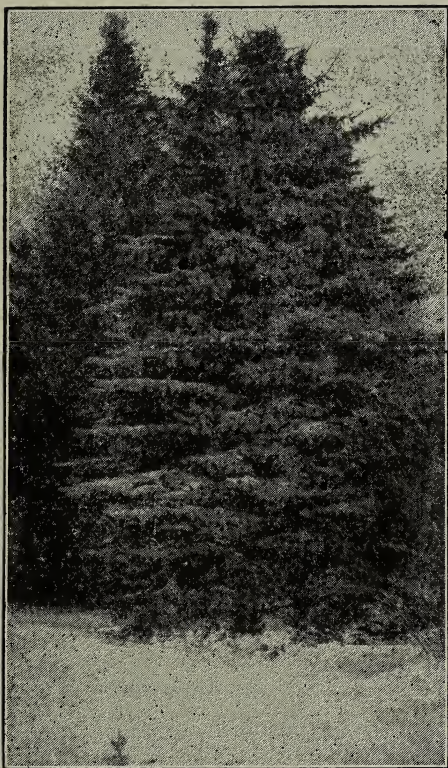

Cut-Leaf Weeping Birch—Extremely vigorous, hardy, most beautiful of ornamental trees, grows quite tall with slender drooping branches, its silvery white bark and delicately cut foliage make a combination not found in any other tree.

Teas Weeping Mulberry—Forms a very dense head of weeping branches extending to the ground, very beautiful, perfectly hardy, popular for lawns.

Kilmornock Weeping Willow—A desirable small lawn tree, having an umbrella-shaped head and with branches drooping to the ground, hardy and a vigorous grower.

Weeping Mountain Ash—A beautiful tree with straggling, weeping branches, makes a fine lawn tree.

Camperdown Elm—One of the most graceful of all weeping trees, having large luxuriant and deep green foliage, adapted for lawn planting.

Colorado Blue Spruce on Bonie
Brae Farm, Warner & Sons, Props.
Humboldt Iowa.

EVERGREENS

Norway Spruce—The most widely planted spruce, a hardy, rapid grower, succeeds in almost any soil, desirable for cemetery, parks or lawns, especially valuable where speedy growth is desired, makes a dense wind break.

Size	Each	Doz.	100	1000
Seedling		.50	1.50	10.00

If interested in evergreens send for our evergreen booklet—"Evergreen Facts."

HARDY FLOWERING ORNAMENTAL SHRUBS

50 cents each. \$5.00 per dozen.

Althea or Rose of Sharon—(Hibiscus)—Fine free growing shrub of easy cultivation, flowers pink, blooms in August and September when other shrubs are out of bloom.

Caragana—(Siberian Pea)—Tall growing shrub with small flowers in June, dark green wood and neat foliage.

Deutzia-Gracilis—Slender, often arching branches, low, dense, globular habit, flowers pure white in racemes.

Pride of Rochester—Flowers double white, back of petals tinged with rose, one of the best.

Dogwood—Siberian or Red twiged, flowers white, very conspicuous in winter when the twigs are blood red.

Forsythia—(Golden Bell)—An early bloomer, flowers appear in quantities before the leaves, flowers deep yellow.

Flowering Almond—Produces very double rose colored flowers in great profusion in early spring.

White Form—Same as above with pure white flowers.

Flowering Peach—A tall upright shrub with small reddish-yellow flowers in early spring.

Flowering Plum—A charming shrub with broad abruptly pointed leaves, produces light pink double flowers in early spring, very vigorous.

Flowering Quince—(Japan)—spreading spiny branches, glossy leaves, flowers deep scarlet in clusters, early spring, the fragrant, golden fruit remains a long time in summer.

Honeysuckle Tartarian—A tall shrub bearing a profusion of pink flowers in June which contrast well with the foliage.

High Bush Cranberry—One of the best shrubs for general planting, white flowers resembling the snowball, the red berries resemble cranberries and remain until early winter.

Rose Acacia—Bears beautiful rose colored flowers on long pedicels in May and June, grows in any soil.

Syringa—(Mock Orange)—Shrub with upright and drooping branches, the pure white, fragrant flowers are produced profusely in clusters in June.

Spirea—(Meadowsweets)

Van Houttei—The finest of all spireas, round graceful bush, with arching branches, in June is covered with beautiful flowers.

Anthony Waterer—A free blooming, compact shrub, with bright, crimson flowers in dense cormbs, flowers freely all summer.

Arguta—A small vigorous growing shrub, the best early flowering white spirea, flowers in May.

Prunifolia—Blossoms in May with pure white double flowers, makes showy specimen plants for lawns.

Salicafolia—Blossoms in mid-summer with large panicles of pure white flowers.

Billardi—(Pink plumed spirea)—Flowers bright pink, in dense fluffy plumes in summer, very showy and attractive.

Thunbergi—(Snow Garland) Flowers pure white, profusely borne in early spring giving it the appearance of a mantle of snow.

Snowberry—A facinating shrub with slender wand-like branches, produces a profusion of feathery blossoms, two sorts; white and red.

Snowball—A grand, hardy shrub with handsome showy flowers produced in large globular clusters.

Sumac; Staghorn—A dense, velvety, hairy, tall growing shrub, brilliant foliage and scarlet heads of fruit in fall.

Cut-Leaf Sumac—A shrub very similar to the common sumac but has its leaves deeply cut, giving it a fern-like appearance.

Purple Fringe—Much admired for its purplish, misty looking flowers borne in early June, in the fall the leaves change to brown, red and yellow.

Wygelia-Eva Rathke—An erect free flowering shrub, flowers a beautiful, brilliant crimson.

Golden Leaved Elder—Vigorous spreading

habit, distinct by reason of its golden foliage one of the best yellow shrubs.

Varigated Elder—A strong healthy grower, foliage mottled with yellow and white.

Yucca Filimentosa—An evergreen shrub with long pointed leaves, producing panicles of large white flowers in mid-summer.

Hydrangea Paniculata Grandiflora—A well known and very popular variety, large, cone-shaped flowers of white which later turn pink and red, blooms profusely in late summer.

Snowball Hydrangea—(Hills of snow)—Easily cultivated, large clusters of snow white flowers, a prolific bloomer.

Bechtel's Double Flowering Crab—A medium sized tree of great beauty, in early spring covered with rose like, fragrant flowers.

HEDGE PLANTS

GLADIOLA BULBS

Mixed Varieties, 75c per doz. \$5.00 per 100

Grand lily-like plants comprising all imaginable colors, shades and variations from the most gorgeous to the softest tints. They deserve to be grown in every garden. They are easily cultivated and do well in any garden soil.

I also grow a complete line of garden plants and vegetables in season. Write for prices on fruit plants and garden truck.

INSTRUCTIONS FOR TRANSPLANTING

None may expect success in planting without a thorough preparation of the soil. It should be in as good condition as far a crop of corn or other hoed crops. Dig the holes large enough to allow the straightening out of all the roots and deep enough to have the trees or plants at their natural depth. Then pack firmly about the roots the fine surface soil and if the ground is dry use plenty of water; if wet, pack the earth very moderately upon the roots, leaving it very loose on the surface. The best location for an orchard is a north slope.

There prices include boxing and baleing and cartage. We sell 6 at dozen rates, 50 at 100 rates, and 500 at 1000 rates in all things. Our trees are first class and packed by experienced help. We also have some 1500 bearing apple trees, $2\frac{1}{2}$ acres of strawberries, $\frac{1}{4}$ acre of raspberries and sell fruit in season fresh from vines or trees. We are located on M. & St. L. and C. & N. W. R. R., and can ship 200 miles in any direction by freight safely, also Adams and American Express Co., and Parcel Post. Please write name and address plainly and give name of express office where it differs from P. O. All orders must be accompanied by cash or satisfactory reference. Send money at our risk by bank draft, postal money order or express order. No personal checks accepted. Trees that die first year, replaced at $\frac{1}{2}$ price. Reference First National Bank. Yours for good trees,
